George Amgad

Software Engineer | Mobile Developer | Cairo, Egypt
+20 122 085 5449 | email: gogoamgad2005@gmail.com
Portfolio: portfolio-nine-neon-53.vercel.app | Github: github.com/George140105

Technical Skills

Languages: JavaScript, TypeScript, Python, Java

Mobile & Web: React Native, React, Expo, Node.js

Backend & Realtime: Firebase, MongoDB, REST APIs, WebSockets

Developer Tools: Git, GitHub, Play Console, Vercel, VS Code, Figma

Experience

Mobile Software Engineer (Part-Time) Aug 2025 – Feb 2026
Hiryo *Hybrid*

- Developed and maintained core features for a family safety mobile app used by multiple user circles, built with React Native and Expo.
- Implemented background location sharing, shared maps, geofencing, and SOS alerts using native Android services and push notifications.
- Revamped the onboarding experience by simplifying flows and permissions handling, reducing early-session drop-offs and support issues.
- Resolved Android-specific issues related to permissions, background execution, and battery optimizations to ensure feature parity with iOS.
- Prepared and managed the Google Play Store release, including internal testing tracks and store compliance.

Mobile Software Engineer (Intern) Jun 2025 – Aug 2025
Hiryo *Hybrid*

- Built a household management mobile app supporting shared task lists, events, and document storage for small household groups.
- Implemented real-time synchronization and notifications using Firebase to keep all household members in sync.

Software Engineer (Intern) Aug 2024 – Dec 2024
KemitWare *Remote*

- Developed cross-platform mobile applications using React Native for Android and iOS.
- Integrated authentication and real-time messaging features by connecting frontend components to backend APIs.
- Worked within an Agile team, contributing features across multiple sprints and participating in peer code reviews.

Projects

Safety & Location Sharing App — React Native, Expo 2024 – 2025

- Built a mobile safety app supporting background location sharing, real-time map updates, SOS alerts, and place-based notifications.
- Implemented geofencing logic and notification workflows to alert circle members when users enter or leave saved locations.
- Handled Android-specific background execution constraints, permissions, and battery optimization behavior.

Household Management App — React Native, Firebase 2024

- Developed a real-time household app with shared tasks, calendars, and document management.
- Designed synchronized updates and notifications using Firebase to maintain consistent state across users.

Portfolio Website — React, Tailwind CSS, Vercel 2023

- Built and deployed a responsive portfolio website showcasing multiple projects with optimized performance and accessibility.

Education

German University in Cairo (GUC) Expected Jun 2027
Bachelor of Science in Computer Science *Cairo, Egypt*

- Full academic scholarship recipient; ranked top 1% nationally based on IGCSE performance.
